Innovative, durable & sustainable outdoor surfacing

Recycled Plastic Ground Reinforcement

This innovative range of products is manufactured from 100% recycled plastic, saved from landfill. This material is ideal for a wide range of applications, especially where direct contact with the ground is a requirement.

GROUND REINFORCEMENT

Paddock slabs and ground reinforcement grids stabilise soft or unsolid ground while preserving a natural finish. Commonly used in equestrian areas they prevent mud, rutting and surface damage in areas exposed to heavy use. The grids allow effective drainage and create a strong, long-lasting surface without the need for permanent hardstanding.

Ground Reinforcement Grid

 **GRID SIZE**
40mm x 333mm x 333mm

Paddock Slab

 **GRID SIZE**
40mm x 400mm x 500mm

Paving Stone and Eco Slabs offer durable, low-maintenance driveways, patios, and walkways made from 100% recycled plastic. Combining modern style with smart drainage, they provide an eco-friendly, long-lasting solution for contemporary homes.

Paving Stone

 **SLAB SIZE**
60mm x 500mm x 500mm

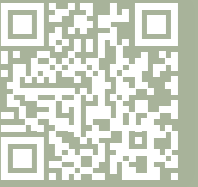

Eco Slab

 **SLAB SIZE**
40mm x 460mm
